

Screen NSW Funding and Incentives: Overview

Each year Screen NSW receives recurrent funding from the NSW Government in the budget for programs and operations. Screen NSW then allocates the program funding across its programs for that year. This process occurs at the start of each year to enable planning for the year across funding rounds.

The allocations are targets only and reflect the organisation's view of industry needs for the coming year and are subject to change based on the volume and quality of applications, changing industry needs and additional funds that may become available due to increased revenues from other sources. A final breakdown of the funding over a year is published in the Screen NSW annual report to industry for that year.

The allocations for the current year, 2015/16, are as follows and are subject to change as a result of specific applications during the year and the need to respond to industry. Please check the website for the current allocations as any changes will be reflected in updates to these allocations:
